

REMARKS

The Notification to Comply with Requirements for Patent Applications Containing Nucleotide and/or Amino Acid Sequence Disclosures indicates that this application fails to comply with the requirements of 37 CFR. 1.821-1.825. By the foregoing amendments to the specification, the Applicants have added a substitute Sequence Listing to the above-referenced application. The Applicants request entry of the foregoing amendment to include the paper copy of the Sequence Listing filed herewith in the specification of the above-referenced application. Accompanying the paper copy of the Sequence Listing is a computer readable version of the Sequence Listing along with a "Statement Pursuant to 37 C.F.R. §§ 1.821 - 1.825" and a copy of the Notice. The Applicants apologize for the typographical errors in the previously submitted sequence listing and submit that no new matter has been added by the submission of this Sequence Listing, relative to the application as originally filed. An explanation of how this sequence listing relates to the original sequence listing and finds support in the application as filed is found in the Applicants' amendment and remarks dated December 2, 2005.

In view of the above amendment, the Applicants believe the pending application is in condition for allowance.

Dated: March 21, 2006

Respectfully submitted,

By 

David A. Gass

AMENDMENTS TO THE SEQUENCE LISTING

Please replace all prior versions of the sequence listing that have been filed with the substitute sequence listing (pages 1-90) submitted herewith.
